EDUCATION

GEORGIA TECH

Class of 2020 | Atlanta, GA
Cumulative GPA: 3.75 / 4.00

B.S. IN COMPUTER SCIENCE

Theory Thread
Intelligence Thread

In-Major GPA: 4.00 / 4.00

CHATTAHOOCHEE HIGH

Class of 2017 | Johns Creek, GA
Top 5% in Class of 493 Students

COURSEWORK

SPRING 2018

Algorithms and Data Structures
Objects and Design
Algorithm Honors

FALL 2017

Object-Oriented Programming
Discrete Math Honors
Modern Physics II

DUAL-ENROLLMENT

Number Theory & Cryptography
Applied Combinatorics
Multivariable Calculus
Linear Algebra

RESEARCH

VIP PROGRAM

Spring 2018 | Atlanta, GA
Automated Algorithm Design

TEACHING

TEACHING ASSISTANT

Spring 2018 | Atlanta, GA
Discrete Math Honors (Head TA)

SKILLS

TECHNOLOGIES

Python • Java • Android Studio

TOOLS

Git • $\LaTeX$ • Linux

ACTIVITIES

ACM-ICPC TEAM | GT PROGRAMMING TEAM

September 2017 - Present | Atlanta, GA

- Represented Georgia Tech at the Regional ACM-ICPC competition.
- Implemented various algorithms, including tree search algorithms and graph traversal algorithms, and learned optimization strategies such as range minimum query.

CTF TEAM | GT GREYHAT CLUB

September 2017 - Present | Atlanta, GA

- Placed 7th / 58 place at the HackGT CTF competition.
- Learned how to solve information security tasks such as cryptography, networks, forensics, and reverse engineering.

GRAND CHALLENGES | GT LIVING LEARNING COMMUNITY

August 2017 - Present | Atlanta, GA

- Prototyped a chat site designed to connect students with peers and/or counselors to reduce stress levels.
- Prototyped an algae-removing underwater vacuum of sorts to be used by anyone with an interest in preserving the natural beauty of aquatic ecosystems.

PROJECTS

HOMELESS SHELTER LOCATOR | ANDROID APP

January 2018 - May 2018 | Atlanta, GA

- Used Android Studio to create a mobile app through which users can find nearby homeless shelters that meet their needs.
- The app includes features such as account log-out, push notifications, password recovery, and social media integration.

ALARM CLOCK | PYTHON COMMAND-LINE

January 2018 | Atlanta, GA

- Used Python to create a simple alarm clock that takes in a text file of YouTube links and plays one at random at a time specified by the user.

AMC ANSWER DISTRIBUTIONS | PYTHON WEB SCRAPER

January 2018 | Atlanta, GA

- Used Python's lxml and Requests libraries to compile the number and percentage of A's, B's, C's, D's, and E's from all Mathematical Association of America (MAA) American Mathematics Competitions (AMC) exams since 2002.

AWARDS

2017	Finalist	OpenBracket Delaware Coding Championship
2017	National	National AP Scholar
2017	7/15 Pts.	American Invitational Math Examination
2017	1 st /71	MIT Science Olympiad Medalist
2017	NLC Qual.	FBLA SLC 2 nd Place
2016	9 th /150	Harvard-MIT Math Tournament Sweepstakes
2016	10 th /150	Harvard-MIT Math Tournament Team
2016	Finalist	Georgia Governor's Honors Program Math Major
2016	6 th /120	National Science Olympiad Medalist
2016	7 th /120	National Science Olympiad Finalist
